The 1977 National Water Conservation Council report stated that the type of farming being done on the land is not sustainable. Agricultural land is being converted into residential areas, and the remaining agricultural land is being used for grazing. The Council's recommendations for the future of the land are to convert the land into a national park, to develop the land for tourism, and to develop the land for agriculture. The Council also recommended that the land be managed in a way that would protect the environment and the interests of the people who live on the land.
